## SELF LEADERSHIP ONLINE

**Self-paced, engaging training teaches your people the mindset and skillset to ask for what they need to be successful.**

When employees are dispersed across the globe, have limited time available for training, or just prefer to learn on their own, it can be difficult to provide quality leadership training to them all, especially to individual contributors. Yet having proactive, empowered team members who take control of their own success and are committed to getting results is key to your company's success.

With Self Leadership Online, you can deliver the essentials of Self Leadership, a training program built on SLII®, the world's most widely taught leadership model, and the latest research on the proactive skills required for individuals to be most effective.

Self Leadership Online is a powerful elearning course that teaches your people the mindset and skillset to become proactive self-starters who ask for direction and support, solicit feedback, and sell their solutions. The course leverages the latest in learning design and advanced technology to teach the core concepts of Self Leadership through engaging activities, which learners complete at their own pace.
